

TRAPPE, MD. AREA POST CARDS

by James Dawson

A compilation of cards from several collections. Printed cards were made in quantity for sale, while cards using actual photographic images could be made in quantity or be one of a kind examples for individuals. Many Trappe cards are known by one copy only.

Views of St. Paul's Church, South Main St. and Trinity M.E. Church South were issued in two versions, one by D.T. Simpson & Son Trappe with uncropped images and the other by L.T. Kaufmann & Sons, Baltimore with the background and especially the trees severely cropped. Other cards known only by one or the other of these names probably existed in both versions, for example the view of Main St. with a Model T parked on the street, and Maple Ave. It is not known if the Simpson versions preceded the Kaufmann versions or if they were issued simultaneously. Kaufmann probably may have printed both versions.

It is possible that post cards 01, 04, 08, 13, 19, 21, 24, 32, 55 and 56 were taken by Trappe photographer James T. Mullikin.

The "greetings from" cards were often not specific to a particular location, but were generic landscapes or images of flowers, etc. left with a space for "your town's name" to be added later usually rubber-stamped or printed by hand. Sometimes the landscapes came with a printed name but were wildly inaccurate, showing impossible topography. One example reads "Scene Near St. Michaels, MD." showing a road winding through a mountain range. Perhaps these were sent out as unsaleable samples and the purchaser would then choose a scene more appropriate to their location for their order.

Most collectors turn their noses up at the generic "greetings from" or "View Near" or "Scene Near..." cards, but they are a valid part of a town's history.
